to me

Hi Sam,

Thank you for your time on the phone.

As discussed, we should have the palynology results available for you tomorrow and can then finalise this report.

We also received this additional information from NMI regarding the TA of your samples;

Total Antimicrobial Activity is expressed as phenol equivalent %.

TA% results calculated for sample:

**V22/001111 was 74%**

**V22/001112 was 63%**

These result numbers are above the standard curve, beyond the linear range of the standard curve and therefore designated >35% TA. These numbers are provided for comparative purposes only and are not for use on labels or product claims.

Should you have any further queries, please don't hesitate to let me know.

Cheers,  
Chris
