Total Antimicrobial Activity	%	> 35	VM1.29
Dates			
Date Tested		20-APR-2023 00:00	

ND = Not Detected.

V23/006973

Total Antimicrobial Activity is expressed as phenol equivalent %.

Results calculated above the standard curve and beyond the linear range of the standard curve are designated >35% Total Activity.

to me

Hi Sam,

Please see the attached results regarding the analysis of your samples.

We've also received the following advice from NMI regarding this testing:

Total Antimicrobial Activity is expressed as phenol equivalent %.

TA% results calculated for sample:

V23/006973 was 46%

V23/006974 was 53%

V23/006975 was 46%

These result numbers are above the standard curve, beyond the linear range of the standard curve and therefore designated >35% TA. These numbers are provided for comparative purposes only and are not for use on labels or product claims.

Should you have any queries regarding the report, please let me know.

Cheers,
Chris
