Hi Sam,

Please find attached the final report for your honey samples. Attached also the comment from NMI for your record:

Total Antimicrobial Activity is expressed as phenol equivalent %.

TA% results calculated for sample:

V24/008832 was 58%

V24/008833 was 46%

These result numbers are above the standard curve, beyond the linear range of the standard curve and therefore designated >35% TA. These numbers are provided for comparative purposes only and are not for use on labels or product claims.

Should you have inquiries regarding the results, please let us know.

Thank you.

Kind Regards,
Ashley
